**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 58-63 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4, 9-14, 16-19, 36, 37 and 38 of U.S. Patent No. 6,736,348 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claim 58 of the instant invention are to be found in claims 1-4, 9-14, 16-19, 36, 37 and 38 of the copending application. The difference between claim 58 of the instant application and claims 1-4, 9-14, 16-19, 36, 37 and 38 of the copending application lies in the fact that the copending application include many more features and thus much more specific (for example, a motor (which is equivalent to the actuator in claim 58 of the instant application) for driving the transfer member). Since claim 58 is anticipated by

claims 1-4, 9-14, 16-19, 36, 37 and 38, it is not patentably distinct from claims 1-4, 9-14, 16-19, 36, 37 and 38.

***Response to Arguments***

3. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
